WORK EXPERIENCE

SOFTWARE ENGINEER

Domain Money | July 2021 - Present

- Developed and managed the marketing and web application using React, NextJS.
- Implemented web app authentication using Password, OTP, and WebAuthN.
- Worked closely with Product and Design team to implement Figma designs.

VICE PRESIDENT | SOFTWARE ENGINEER

Marcus by GoldmanSachs | Dec 2020 - June 2021

- Led the document upload center initiative using React, NextJS, and GraphQL. Provided a streamlined experience while reducing code duplication and resources.
- Developed multi-factor authentication feature that enabled users to OTP before making sensitive API calls.
- Updated Marcus web application to be resistant to CSRF attacks without affecting others lines of business.

ASSOCIATE | SOFTWARE ENGINEER

Marcus by GoldmanSachs | Mar 2019 - Dec 2020

- Developed the Monthly Snapshot feature to provide users with their financial insights.
- Worked closely with Product and Design on multiple initiatives to ensure features meet proper requirements and deliverable expectations, as well as site consistency.

SENIOR UI DEVELOPER

Softvision | Dec 2017 - Mar 2019

- Worked with the Lending team at Marcus by Goldman Sachs to improve user acquisition, funnel conversion, and redesign existing lower funnel pages.

CO-FOUNDER | SOFTWARE ENGINEER

Scoutlit | May 2014 - Apr 2021

- Redesigned the hybrid mobile app using React Native, Material Design, Redux, and updated APIs.
- Created wire-frames and flow charts for Scoutlit Mobile app and Website.
- Developed Scoutlit Basketball App using Ionic and AngularJS.
